

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**LISTING OF CLAIMS:**

1. (Original) A powder metal composition for producing powder metal components comprising a Co-based pre-alloyed powder, with irregularly shaped particles comprising at least 15% by weight Cr and less than 0.3% by weight C, admixed with graphite.
2. (Original) A powder metal composition according to claim 1 further comprising at least one element selected from the group consisting of W and Mo.
3. (Previously Presented) A powder metal composition according to claim 1, further comprising at least one alloying element selected from Ni, Fe, Si, Mn, V and B.
4. (Previously Presented) A powder metal composition according to claim 1, wherein the content of C in the pre-alloyed powder is less than 0.1% by weight.
5. (Previously Presented) A powder metal composition according to claim 1, comprising: 15-35% by weight Cr, 0-20% by weight W, 0-25% by weight Ni, 0-5% by weight Si, 0-5% by weight Fe, 0-10% by weight Mo, the balance being Co.

6. (Previously Presented) A powder metal composition according to claim 1, wherein the content of admixed graphite is at least 0.5% by weight.

7. (Previously Presented) A composition according to claim 1, further comprising one or more additives selected from the group consisting of lubricants, processing aids alloying elements and binders.

8. (Withdrawn) A method for producing a component of a Co-based alloy with high green strength and high green density comprising the steps:

a) providing a powder metal composition comprising a Co-based pre-alloyed powder, with irregularly shaped particles comprising at least 15% by weight Cr and less than 0.3% by weight C, admixed with graphite; and

b) compacting the composition in a die at a pressure of at least 400 MPa to a component of desired shape.

9. (Currently Amended) The method ~~Method~~ according to claim 8, wherein the pre-alloyed powder contains less than 0.1% by weight C.

10. (Currently Amended) The method ~~Method~~ according to claim 8, wherein the content of admixed graphite is at least 0.5% by weight.

11. (Currently Amended) The method ~~Method for producing a sintered component of a Co-based powder metal composition comprising, in addition to step a) and b)~~ according to claim 8, further comprising the step:

c) sintering the component.

12. (Currently Amended) The method ~~Method~~ according to claim 11, wherein the sintering is performed at a temperature of at least 1080°C in a protective atmosphere or vacuum.

13. (Currently Amended) A Co-based pre-alloyed atomized powder with irregularly shaped particles comprising at least 15% by weight Cr and less than ~~0.3%~~ 0.1% by weight C.

14. (Previously Presented) A powder metal composition according to claim 2, further comprising at least one alloying element selected from Ni, Fe, Si, Mn, V and B.

15. (Previously Presented) A powder metal composition according to claim 2, wherein the content of C in the pre-alloyed powder is less than 0.1% by weight.

16. (Previously Presented) A powder metal composition according to claim 3, wherein the content of C in the pre-alloyed powder is less than 0.1% by weight.

17. (Previously Presented) A powder metal composition according to claim 1, wherein the content of C in the pre-alloyed powder is less than 0.05% by weight.

18. (Previously Presented) A powder metal composition according to claim 1, wherein the content of the admixed graphite is at least 0.7% by weight.

19. (Currently Amended) The method ~~Method~~ according to claim 8, wherein the pre-alloyed powder contains less than 0.05% by weight C.

20. (Currently Amended) The method ~~Method~~ according to claim 9, wherein the content of admixed graphite is at least 0.5% by weight.

21. (Currently Amended) The method ~~Method~~ according to claim 8, wherein the content of the admixed graphite is at least 0.7% by weight.

22. (Currently Amended) The method ~~Method~~ according to claim 9, wherein the content of the admixed graphite is at least 0.7% by weight.

23. (New) The powder according to claim 13, wherein the carbon content is less than 0.05% by weight.

24. (New) The powder according to claim 23, consisting essentially by weight of 15-35% Cr, 0-20% W, 0-25% Ni, 0-5% Si, 0-5% Fe, 0-10% Mo, balance Co.

25. (New) The powder according to claim 23, consisting essentially by weight of 15-35% Cr, 0-20% W, 0-25% Ni, 0-5% Si, 0-5% Fe, 0-10% Mo, 0-3% Mn, 0-4% V, 0-4% B, balance Co.
